USE YOUR CREATIVE SKILLS AND BRING THE RUTHERFORD'S DEN LECTURE THEATRE AND ALL THESE QUIRKY NZ NATIVE BIRDS TO LIFE WITH COLOUR.

FUN FACT

Did you know that when Ernest Rutherford was a student at Canterbury College, a diagram of an atom had no nucleus because he hadn't proven it was there yet. By proving the existence of a nucleus he changed our world. His discoveries allowed for the creation of modern-day technology like cell phones and internet. So thanks to Ernest, we are lucky have this technology to connect with each other.
